GREATER NOIDA, UTTAR PRADESH

INTERNSHIP COMPLETION REPORT

Data Science Master

8-Week Virtual Internship | June – August 2026

STUDENT CREDENTIALS

Saumya Kashyap

Roll No: 2410031737

B.Tech Student

INSTITUTION & PARTNER

IILM University, Greater Noida

EduSkills Academy

Student & Internship Overview

Candidate Details

STUDENT NAME

Saumya Kashyap

ROLL NUMBER

2410031737

DEGREE & DEPARTMENT

B.Tech (Computer Science & Engineering)

UNIVERSITY

IILM University, Greater Noida, U.P.

Internship Profile

PROGRAM NAME

Data Science Master Virtual Internship

ORGANIZATION

EduSkills Academy

DOMAIN & SUPPORT

Data Science (Supported by Siemens)

DURATION

8 Weeks (June 2026 – August 2026)

**Information verified against official EduSkills internship certificate*

Organization Profile — EduSkills Academy

EduSkills is a non-profit organization focused on bridging the gap between academia and industry. Its primary mission is to develop Industry 4.0-ready digital skills among students across India.

The academy operates under the patronage of the **AICTE National Internship Portal**, partnering with global technology leaders to provide world-class curriculum and hands-on exposure to emerging domains.

Industry Readiness

Equipping students with technical expertise required by modern global tech organizations.

Structured Learning

Comprehensive curriculum involving learning modules, assessments, and project-oriented practice.

Digital Skill Focus

Focus on high-demand domains like Data Science, AI, Cloud, and Cybersecurity.

STRATEGIC INDUSTRY PARTNER

Internship Overview & Learning Journey

The 8-week virtual internship provided a comprehensive learning path, transitioning from theoretical foundations to practical application in the Data Science domain.

Data Science Context & Industry Challenge

The Industry Challenge

Modern organizations generate vast amounts of raw data, yet much of it remains underutilized due to:

- Inconsistent and fragmented data sources
- High volume of noise and missing values
- Complexity in identifying non-obvious patterns
- Lack of actionable evidence-based insights

The Data Science Solution

The Data Science Master internship addresses these challenges by applying a structured analytical scope:

- Systematic data cleaning and preprocessing
- Exploratory Data Analysis (EDA) for trend detection
- Advanced visualization for effective communication
- Data-driven decision-making frameworks

Objectives & Data Science Workflow

Internship Objectives

- Understand the end-to-end Data Science lifecycle and industry standards.
- Develop proficiency in data cleaning and preprocessing techniques.
- Perform Exploratory Data Analysis (EDA) to identify trends and patterns.
- Create meaningful visualizations to communicate data-driven insights.
- Apply analytical and machine learning concepts to real-world datasets.

Data Science Workflow

Technologies & Tools

PROGRAMMING

Python

Primary language for data analysis and scripting.

DATA HANDLING

Pandas

Data manipulation and structural analysis.

NumPy

Numerical computing and array processing.

VISUALIZATION

Matplotlib

Static, animated, and interactive visualizations.

Seaborn

Statistical data visualization based on Matplotlib.

ANALYTICS

Data Preprocessing

Cleaning and preparing raw data for analysis.

EDA Concepts

Exploratory Data Analysis for pattern discovery.

**Tool emphasis is presented at the verified domain level; no unsupported project-specific stack is claimed.*

Methodology & Preprocessing

INTERNSHIP METHODOLOGY

DATA PREPROCESSING ACTIVITIES

Activity	Purpose & Impact
Missing Value Review	Identified and handled null entries to ensure dataset completeness and prevent bias in analytical results.
Inconsistency Checks	Verified data integrity by removing duplicate records and correcting formatting errors across features.
Data Type Handling	Ensured correct operational formats (numeric, categorical, datetime) for accurate mathematical processing.
Feature Preparation	Transformed raw variables into structured inputs suitable for exploratory analysis and modeling.

Exploratory Analysis, Visualization & Analytics

UNDERSTAND

Inspecting the fundamental structure of the dataset to identify core characteristics.

- Statistical distributions
- Correlation analysis
- Outlier detection
- Trend identification

VISUALIZE

Transforming complex numerical data into intuitive visual representations.

- Comparative bar charts
- Distribution histograms
- Relationship scatter plots
- Time-series line graphs

INTERPRET

Translating analytical observations into actionable evidence-based insights.

- Pattern recognition
- Hypothesis validation
- Insight documentation
- Decision support

**No project-specific metrics or model performance are claimed without supporting material.*

Outcomes, Skills & Future Scope

TECHNICAL OUTCOMES

- ✓ Proficiency in Python-based data handling and manipulation.
- ✓ Systematic approach to data cleaning and preprocessing.
- ✓ Ability to create impactful statistical visualizations.
- ✓ Understanding of the end-to-end Data Science workflow.

PROFESSIONAL SKILLS

- ✓ Analytical thinking and evidence-based problem solving.
- ✓ Technical documentation and reporting standards.
- ✓ Effective communication of complex data insights.
- ✓ Industry-oriented project management exposure.

FUTURE SCOPE

- Implementation of advanced predictive modeling.
- Development of automated data processing pipelines.
- Integration of AI/ML for business intelligence.
- Exploration of Big Data and real-time analytics.

Certificate & Official Verification

Official Record Details

Recipient	Saumya Kashyap
Institution	IILM University, Greater Noida
Internship	Data Science Master
Duration	8 Weeks (Completed)
Period	June – August 2026
Supported By	Siemens
Issuing Org	EduSkills Academy

**Certificate image reproduced from the uploaded original. All details verified against the official EduSkills internship record.*

Thank You!

Saumya Kashyap
